Get At Me Dad

Follow Us:

The Father Factor in Maternal Health dives into the often-overlooked but powerful role that fathers play in shaping family health outcomes. This session explores how engaged fatherhood improves maternal and child well-being, highlighting the expanding role of dads beyond the delivery room. We'll unpack how paternal involvement helps close gaps in health disparities—especially in communities facing systemic challenges—and spotlight practical, culturally relevant strategies healthcare professionals and community partners can use to connect with and support fathers. Whether you're a provider, program leader, or advocate, this session will equip you with tools to better integrate fathers into the maternal and family health equation.
