Inland Empire Breastfeeding Coalition presents:

FREE Virtual General Education Session

Beyond the Latch: Recognizing the Impact of Undiagnosed Tongue Ties

Objectives:

1. Identify factors beyond an infant's underlying diagnosis or syndrome that may contribute to breastfeeding and feeding difficulties.
2. Recognize how an untreated tongue tie may contribute to low tone, poor oral function, and breastfeeding difficulties in infants with Down syndrome.
3. Explain why evaluation for oral restrictions should be considered when appropriate before pursuing more invasive feeding interventions, including G-tube placement.
4. Identify strategies for supporting infants diagnosed with failure to thrive.

January 19th 2027
(3rd Tuesday of the month due to CBC Summit 4th week)
